

# General Description(产品描述)

SE82XX series is designed for powersensitive applications. It includes a precision and high voltage input stage, an ultra-lowpower bias current branch, and results in a ultra-low-power and low-dropout linear regulator.

The SE82XX operates from an input voltage of  $V_{OUT}$ +1V to 35V, consumes only 2.5µA of quiescent current, and offers 1% initial accuracy and low dropout voltage, 300mV typical at 100mA.

SE82XX provides fixed 3.0V, 3.3V and 5V outputs.

Other features include short-circuit protection and thermal shutdown.
